LEVEL: PROFICIENT

Evaluate information, make decisions and create solutions for business problems through the application of critical and analytical thinking.

A business's success depends on their team members' ability to evaluate information, make decisions and create solutions using critical and analytical thinking. This course aims to help you critically evaluate the information you use in your workplace and apply critical thinking principles to translate concepts or creative ideas into solutions for business problems. You will explore methodologies to investigate issues, how to apply logical thinking and draw conclusions, as well as how to challenge assumptions.

What You Will Learn

This course in critical thinking aims to provide you with the concepts to apply critical thinking principles with limited guidance to translate concepts or creative ideas into solutions for known business problems. In this course, you will cover methodology, logical evaluation and critical analysis.

Course Outcomes

- Define the critical elements of the procedure for completing a routine inquiry or investigation
- View and reframe problems or issues from multiple perspectives to better identify possible solutions or cause and effect relationships
- Use inquiry, logic and reasoning to test assumptions about a problem
- Modify and refine basic investigative processes, techniques and tools to improve insights and results
